## Summary

I am a Full-Stack Web Developer proficient in Vue, Typescript, React, Node, Express, and Postgresql. I have 3 years of experience as a professional software developer and over a decade of experience in customer service and sales. My diverse work experience has helped me develop advanced communication, teamwork, and problem-solving skills. It's my dream to develop technology that genuinely helps people on a daily basis. Whether that involves shipping new features or fixing existing technical problems, I am passionate about solving the problems in front of and ahead of me.

## Relevant Work Experience

### ZulaFly - Software Developer

January 2021 - PRESENT

Established myself as an integral part of a small team of developers in my first few months at ZulaFly. With only three other developers in the company at the time of my hiring, I had to quickly learn Vue and a completely different tech stack than what I had learned in my boot camp. I soon moved from exclusively handling small bug fixes to implementing new features and mobile solutions.

### Tech Stack

Typescript  
Vue  
Vuetify  
Vite  
SignalR  
Azure  
.NET Maui  
C#  
MongoDB

### Accomplishments:

- ⇒ After 6 months, I was trusted with handling UX/UI design and integration of new endpoints on the front end of our web-app
- ⇒ Redesigned and added new features for handling real time notifications, from urgent notifications requiring immediate action to the toast notifications.
- ⇒ Built an entire new reporting feature that displays charting data for the client's entire enterprise, which included building an SVG heatmap from scratch that programmatically changes based on available real time data.
- ⇒ Designed and implemented 90% of new UI features for the last 3 releases of our web app

### Daily Duties:

- ⇒ Collaborate with cross-functional teams to design, develop, and maintain web and mobile applications.
- ⇒ Participate in the full software development lifecycle, from requirement analysis to deployment.
- ⇒ Conduct thorough testing and debugging to ensure the reliability and functionality of software applications.
- ⇒ Assist in optimizing application performance and resolving technical issues
- ⇒ Meet with product owners and development team to design and develop new features and bug fixes

## Additional Work Experience

### **JL Beers** - Supervisor/Beertender

*December 2015 - August 2022, Burnsville, MN*

Quickly became an invaluable employee and was promoted to supervisor within the first year working there.

Developed multiple methods that are still used to complete a lot of daily tasks, everything from closing the store down quickly and effectively to spreadsheets that help split tips up and count down the safe.

### **Boonya Systems** - Account Manager

*July 2015 - December 2015, Bloomington, MN*

Rebuilt company website with a WordPress template that I modified to the best of my ability.

Built an email marketing campaign targeted at private practices focused on teaching them about HIPAA compliance as it relates to technology.

Lead multiple speaking engagements with private practice owners and managers teaching them how to better protect their patients sensitive information

### **Radiate Digital** - Account Executive

*March 2014 - July 2015*

The first full-time salesperson at a small web design/marketing company. The company was transitioning to selling custom-designed websites from the ground up at an affordable monthly price.

Acquired multiple big clients in my first couple of months, as well as multiple monthly based clients.

Learned the basics of web design and development, digital marketing, SEO, and more.

## Education

### **Thinkful** - Full-Stack Engineering Flex

*February 2020 - December 2020*

JavaScript-based intensive program that teaches both front-end and back-end technologies, which enabled me to build an app from wireframe and design to building out the database.

## Technical Skills

### *Front-end*

HTML, CSS, JavaScript, SCSS, TypeScript, XML

### *Frameworks*

Vue, Svelte, React, React Native, Express.js, jQuery, Expo, .NET Maui

### *Back-end*

Node.js, Postgresql, Heroku, Vercel, SQL, Kotlin, C#

### *Dev Tools*

Git, GitHub, Azure, Chrome Dev Tools, Postman, Google Analytics
